OriGen Museum Complex Current Floor Plan

OriGen Museum Complex Future Floor Plan

An aerial photograph of a massive, rounded rock formation in a canyon. The Colorado River flows in a wide, U-shaped bend around the base of the rock. The sun is positioned directly behind the peak of the rock formation, creating a bright sunburst effect with rays of light spreading across the sky. The canyon walls are rugged and layered with reddish-brown rock. The overall scene is bathed in the warm, golden light of sunrise or sunset.

Colorado River Exhibit
